Here is a major update to our report on Wednesday on voter fraud in New Hampshire.

As we previously reported —

A recent hand recount in the Rockingham District 7 NH House Race in Windham, New Hampshire, found that the Dominion-owned voting machines [shorted EVERY REPUBLICAN](#) by roughly 300 votes.

RECOUNT - State Representative Rockingham District 7							
Soti, r	Recount	Griffin, r	Recount	Lynn, r	Recount	McMahon, r	Recount
4,480	4,777	5,292	5,591	4,786	5,089	5,256	5554
	297		299		303		298
St.Laurent, d	Recount	Azibert, d	Recount	Roman, d	Recount	Singureanu, d	Recount
4,456	4,357	2,787	2,808	3,415	3,443	2,764	2782
	-99		21		28		18
33,236	34,401						

The Dominion machine counted results were wrong for all 4 Republicans in Windham by almost exactly 300 votes.

[Granite Grok](#) reported:

The Town of Windham used Dominion machines to count paper ballots and upon a believable hand recount, it was confirmed each Republican was machine-cheated out of roughly 300 votes.

You would think this would have been solved by the Dominion machine company, the Secretary of State, the Elections Unit of the AG's Office, or the laughable Ballot Law Commission. (Kathy Sullivan, d (Term expires July 1, 2024))

Nope.

Just like every other state that used machines that alter ballot counts in favor of one political party over another – here we are.

### **Dominion Voting Systems owns the intellectual property of the AccuVote machines used in New Hampshire.**

[Patch.com](#) reported:

In New Hampshire, he noted, the AccuVote optical scanners used in all communities that have voting machines are an “older technology” and each moderator uses the device’s results tape, at the end of the night, to reveal the results, on a paper “Return of Votes” form. AccuVote devices have been used for more than a quarter of a century in the state and are the only devices approved by the Ballot Law Commission.

“The device was originally manufactured by Unisys, then by Global Elections Systems Inc., which are no longer in business,” Yen said. “The device used in New Hampshire is no longer being manufactured. Dominion (Voting Systems) owns the intellectual property of the AccuVote and its related election management system but does not manufacture the device.”

On Thursday we spoke with **Dr. David Strang M.D.**, the Belknap County Republican Committee State Committee Member, New Hampshire GOP.

David told The Gateway Pundit that the Republican candidates in Windham had 6% of their total votes removed by the Dominion-owned voting machines.

According to Dr. Strang, these same Dominion-owned machines are used in 85% of the towns in New Hampshire.

What makes [the New Hampshire results](#) even more suspect:

\*\* Republicans flipped the New Hampshire Senate from 14-10 Democrat to 14-10 Republican in 2020.

\*\* Republicans flipped the New Hampshire House from 230-156 majority Democrat to 213-187 Republican majority in 2020!

\*\* Yet, Joe Biden who was 4th in Dem primary and Kamala Harris, who did not make it to the Dem primary, won the state 52.7 to 45.4 to Trump.

**These results are IMPOSSIBLE.**

What Democrats did was skim 6% off each GOP candidate in each race where there was a recount.

This MUST BE investigated if we can EVER trust our election process again!

**Despite these recent findings New Hampshire Attorney General Anne Edwards, a Republican, has no plans to investigate the alleged voter fraud in the state.**

**Please contact New Hampshire Attorney General’s office!** NH Department of Justice

Anne Edwards, Attorney General

33 Capitol Street

Concord, NH 0330
