Michigan Secretary of State Jocelyn Benson

For years now, radical Soros-funded Michigan Secretary of State Jocelyn Benson has been working overtime to make Michigan elections less secure and ripe for fraud.

Benson has been behind these efforts.

- ** Announced poll challengers would be removed from counting rooms if they asked too many questions – this was later overturned by a judge.
- ** Insisted she has prioritized cleaning up voter rolls – another lie.
- ** Directed city clerks to ignore signature matching on absentee ballots – was later called out by a judge.
- ** Ignored the GBI Strategies ballot registration manufacturing scandal.
- ** Ignored the hundreds of reported cases of individuals who cast more than one vote in several of the latest elections.
- ** Allowed at least 48,000 non-legal voter registrations to be certified at trailer parks and

apartment housing addresses.

** And Benson's office was sending out late registrations to several Michigan counties before the 2020 election – several packages were marked PPE!

Jocelyn Benson has been working overtime to ensure the Michigan elections are less secure and more open to fraudulent activity.

This weekend Secretary of State Benson sent out a threat to anyone who may think of challenging the upcoming 2024 election.

SOS Benson is calling on Michiganders to snitch on their family and neighbors.

The tyrannical Democrat Secretary of State has gone full Stasi.

This letter was recently sent out from the Michigan Secretary of State's office.

Notice the final paragraph:

“If you see misleading or inaccurate information regarding voting or elections in Michigan, please report it – and include an image if possible – to .”

Michigan Bureau of Elections

Election misinformation

The act of spreading misinformation about the election process, voter rights, or even an issue on the ballot is a serious threat to election security. These efforts – be they foreign, domestic, partisan, or simply malicious – are designed to create mistrust in our elections process and are damaging to a healthy democracy.

Countering misinformation

Counteracting harmful misinformation by knowing the truth is critical to not only ensuring our elections are a secure and accurate reflection of the will of the people, but to the survival of our democratic process.

Because of the vast amount of information available, it is more important than ever to be a critical consumer of media and to decipher the many competing messages coming from a variety of sources. The use of artificial intelligence technology to create realistic deepfake images, audio, videos and fake comments poses an increasing threat.

If you are unsure whether a story or claim is true, you can get trusted, verified nonpartisan information from the Michigan Bureau of Elections, your local clerk and these sites:

- **Michigan.gov/SOSFactCheck** – Provides accurate information about Michigan elections
- **Snopes.com** – Investigates and debunks misinformation, conspiracy theories and hoaxes
- **FactCheck.org** – Verifies accuracy of political speech, ads, debates, interviews and press releases
- **PolitiFact** – Verifies accuracy of statements made by politicians

Do your part!

Just as election officials have a duty to detect election misinformation and quickly provide correct information based on the law, voters have a responsibility to proactively seek out reliable sources of information and encourage productive and honest dialogue.

If you see misleading or inaccurate information regarding voting or elections in Michigan, please report it — and include an image if possible — to Misinformation@Michigan.gov.
