

Thank You President Trump

I am writing this open letter to you with a heart of sorrow for our nation, but appreciation that you have fought so hard to save her from the Marxist traitors among us, and their co-conspirators around the world. I am one who has encouraged you not to surrender the White House to them – knowing that will represent the end of our constitutional republic and the beginning of our absorption into a new global Marxist order.

I know there are still active theories that you will take some last-minute action to thwart the Purple Revolution and stay in power – and I would strongly support you in that – but at this point, after your every move to uphold election integrity and the rule of law has been blocked by traitors and misrepresented by Big

Tech and Big Media, these final supposed options seem like wishful thinking. (I would love to be proven wrong on that.)

So I just want to say, on behalf of the MAGA Hundred Million, that we will never forget what you have done for us, and that should you decide to carry this fight on into the private sector by – for example – launching a news and social media to compete with and soon totally crush the current corrupt cabal, you will have the biggest army of volunteers to help you that the world has ever seen. And should you decide to take over the GOP or start a new MAGA Party, we're in for that too!

May God Richly Bless You and Your Family,

Dr. Scott Lively
