

Covid Truths: Dangers of the “Vaccines” Are Increasingly Revealed

 expose-news.com/2022/05/22/dangers-of-the-vaccines-are-increasingly-revealed/

By Rhoda Wilson

May 22, 2022

While most researchers, virologists, infectious disease researchers and epidemiologists have been intimidated into silence, a growing number of high integrity individuals with tremendous expertise have come forward, to tell the truth—that is, that these vaccines are deadly.

By [Russell L. Blaylock](#), 22 April 2022

Most new vaccines must go through extensive safety testing for years before they are approved. New technologies, such as the mRNA and DNA vaccines, require a minimum of 10 years of careful testing and extensive follow-up. These new so-called vaccines were “tested” for only 2 months and then the results of these safety tests were and continue to be kept secret. Testimony before Senator Ron Johnson by several who participated in the 2 months study indicates that virtually no follow-up of the participants of the pre-release study was ever done. Complaints of complications were ignored and despite promises by Pfizer that all medical expenses caused by the “vaccines” would be paid by Pfizer, these individuals stated that none were paid. Some medical expenses exceed 100,000 dollars.

As an example of the deception by Pfizer, and the other makers of mRNA vaccines is the case of 12-year-old Maddie de Garay, who participated in the Pfizer vaccine pre-release safety study. At Sen. Johnson's presentation with the families of the vaccine injured, her mother told of her child's recurrent seizures, that she is now confined to a wheelchair, must be tube fed and suffers permanent brain damage. On the Pfizer safety evaluation submitted to the FDA her only side effect is listed as having a “stomach ache”. Each person submitted similar horrifying stories.

The Japanese resorted to a FOIA (Freedom of Information Act) lawsuit to force Pfizer to release its secret biodistribution study. The reason Pfizer wanted it kept secret is that it demonstrated that Pfizer lied to the public and the regulatory agencies about the fate of the injected vaccine contents (the mRNA enclosed nano-lipid carrier). They claimed that it remained at the site of the injection (the shoulder), when in fact their own study found that it rapidly spread throughout the entire body by the bloodstream within 48 hours.

The study also found that these deadly nano-lipid carriers collected in very high concentrations in several organs, including the reproductive organs of males and females, the heart, the liver, the bone marrow, and the spleen (a major immune organ). The highest concentration was in the ovaries and the bone marrow. These nano-lipid carriers also were deposited in the brain.

Dr. Ryan Cole, a pathologist from Idaho reported a dramatic spike in highly aggressive cancers among vaccinated individuals, (not reported in the [corporate] media). He found a frighteningly high incidence of highly aggressive cancers in vaccinated individuals, especially highly invasive melanomas in young people and uterine cancers in women. Other reports of activation of previously controlled cancers are also appearing among vaccinated cancer patients. Thus far, no studies have been done to confirm these reports, but it is unlikely such studies will be done, at least studies funded by grants from the NIH.

The high concentration of spike proteins found in the ovaries in the biodistribution study could very well impair fertility in young women, alter menstruation, and could put them at an increased risk of ovarian cancer. The high concentration in the bone marrow could also put the vaccinated at a high risk of leukaemia and lymphoma. The leukaemia risk is very worrisome now that they have started vaccinating children as young as 5 years of age. No long-term studies have been conducted by any of these makers of covid-19 vaccines, especially as regards the risk of cancer induction. Chronic inflammation is intimately linked to cancer induction, growth and invasion and vaccines stimulate inflammation.

Cancer patients are being told they should get vaccinated with these deadly vaccines. This, in my opinion, is insane. Newer studies have shown that this type of vaccine inserts the spike protein within the nucleus of the immune cells (and most likely many cell types) and once there, inhibits two very important DNA repair enzymes, BRCA1 and 53BP1, whose duty it is to repair damage to the cell's DNA. Unrepaired DNA damage plays a major role in cancer.

There is a hereditary disease called xeroderma pigmentosum in which the DNA repair enzymes are defective. These ill-fated individuals develop multiple skin cancers and a very high incidence of organ cancer as a result. Here we have a vaccine that does the same thing but to a less extensive degree.

One of the defective repair enzymes caused by these vaccines is called BRCA1, which is associated with a significantly higher incidence of breast cancer in women and prostate cancer in men.

It should be noted that no studies were ever done on several critical aspects of this type of vaccine.

They have never been tested for long term effects.

They have never been tested for induction of autoimmunity.

They have never been properly tested for safety during any stage of pregnancy.

No follow-up studies have been done on the babies of vaccinated women.

There are no long-term studies on the children of vaccinated pregnant women after their birth (especially as neurodevelopmental milestones occur).

It has never been tested for effects on a long list of medical conditions:

- Diabetes
- Heart disease
- Atherosclerosis
- Neurodegenerative diseases
- Neuropsychiatric effects
- Induction of autism spectrum disorders and schizophrenia
- Long term immune function
- Vertical transmission of defects and disorders
- Cancer
- Autoimmune disorders

Previous experience with the flu vaccines clearly demonstrates that the safety studies done by researchers and clinical doctors with ties to pharmaceutical companies were essentially all either poorly done or purposefully designed to falsely show safety and cover-up side effects and complications. This was dramatically demonstrated with the previously mentioned phoney studies designed to indicate that hydroxychloroquine and ivermectin were ineffective and too dangerous to use. These fake studies resulted in millions of deaths and severe health disasters worldwide. As stated, 80% of all deaths were unnecessary and could have been prevented with inexpensive, safe repurposed medications with a very long safety history among millions who have taken them for decades or even a lifetime.

It is beyond ironic that those claiming that they are responsible for protecting our health approved a poorly tested set of vaccines that has resulted in more deaths in less than a year of use than all the other vaccines combined given over the past 30 years. Their excuse when confronted was—“we had to overlook some safety measures because this was a deadly pandemic.”

In 1986 President Reagan signed the National Childhood Vaccine Injury Act, which gave blanket protection to pharmaceutical makers of vaccines against injury litigation by families of vaccine-injured individuals. The Supreme Court, in a 57-page opinion, ruled in favour of the vaccine companies, effectively allowing vaccine makers to manufacture and distribute dangerous, often ineffective vaccines to the population without fear of legal consequences. The court did insist on a vaccine injury compensation system which has paid out only a very small number of rewards to a large number of severely injured individuals. It is known that it is very difficult to receive these awards. According to the Health Resources and Services Administration, since 1988 the Vaccine Injury Compensation Program (VICP) has agreed to pay 3,597 awards among 19,098 vaccine-injured individuals applying amounting to a total sum of \$3.8 billion. This was prior to the introduction of the covid-19 vaccines, in which the deaths alone exceed all deaths related to all the vaccines combined over a thirty-year period.

In 2018 President Trump signed into law the “right-to-try” law which allowed the use of experimental drugs and all unconventional treatments to be used in cases of extreme medical conditions. As we have seen with the refusal of many hospitals and even blanket refusal by states to allow ivermectin, hydroxychloroquine or any other unapproved “official” methods to treat even terminal covid-19 cases, these nefarious individuals have ignored this law.

Strangely, they did not use this same logic or the law when it came to ivermectin and hydroxychloroquine, both of which had undergone extensive safety testing by over 30 clinical studies of high quality and given glowing reports on both efficacy and safety in numerous countries. In addition, we had a record of use for up to 60 years by millions of people, using these drugs worldwide, with an excellent safety record. It was obvious that a group of very powerful people in conjunction with pharmaceutical conglomerates didn't want the pandemic to end and wanted vaccines as the only treatment option. Kennedy's book makes this case using extensive evidence and citations.

Dr. James Thorpe, an expert in maternal-foetal medicine, demonstrates that these covid-19 vaccines given during pregnancy have resulted in a 50-fold higher incidence of miscarriage than reported with all other vaccines combined. When we examine his graph on foetal malformations there was a 144-fold higher incidence of foetal malformation with the covid-19 vaccines given during pregnancy as compared to all other vaccines combined. Yet, the American Academy of Obstetrics and Gynaecology and the American College of Obstetrics and Gynaecology endorse the safety of these vaccines for all stages of pregnancy and among women breastfeeding their babies.

It is noteworthy that these medical speciality groups have received significant funding from Pfizer pharmaceutical company. The American College of Obstetrics and Gynaecology, just in the 4th quarter of 2010, received a total of \$11,000 from Pfizer Pharmaceutical company alone. Funding from NIH grants is much higher. The best way to lose these grants is to criticise the source of the funds, their products or pet programs. Peter Duesberg, because of his daring to question Fauci's pet theory of AIDS caused by the HIV virus, was no longer

awarded any of the 30 grant applications he submitted after going public. Prior to this episode, as the leading authority on retroviruses in the world, he had never been turned down for an NIH grant. This is how the “corrupted” system works, even though much of the grant money comes from our taxes.

Russel Blaylock, a retired American neurosurgeon, wrote the above in an extensive article, ‘*Covid Update: What’s the truth?*’, published on 22 April in the Surgical Neurological International journal. We are republishing sections, more easily digestible portions, of his article as a series of articles titled ‘Covid Truths’.

This article is the fourth in our series and covers the section titled ‘Dangers of the Vaccines Are Increasingly Revealed by Science’ in Blaylocks’s article.

Although we have not included them, Blaylock’s article is well referenced.
