

Russell Blaylock: What I learned

- Most critics are not from the world of science, but rather politics, assortment of trolls and those who have a financial stake in the vaccine. They all have an agenda that does not include people's health.
- You enemies will not resort to logic, scientific studies, or critical thinking—they resort to ad hominem attacks, gaslighting and slander. Personal attacks are their modus operandi
- We see highly credentialed, prestigious and extensively published people demonized by those wishing to control the narrative. Their opinions are deleted on all sources of public communication. What are they afraid of?
- Why have the proponents of the injections refused to debate those opposing the injections? Why have they never offered evidence that what I have said in my papers is not true? Steve Krisch has offered substantial cash to anyone who will debate him and prove him wrong in his opposition. There are no takers.
- Why have the majority of the scientific community remained silent during the entire shameful debacle? What is keeping the physicians silent?
- Why are so many trusting pharmaceutical companies that have collectively been fined over 10 billion dollars for fraud and serious violations of safety standards in manufacturing? Pfizer alone has been fined tens of millions of dollars for such violations, even for criminal conduct that costs many lives. One pharmaceutical company alone paid out hundreds of millions of dollars for such violations that cost over 100,000 lives by some estimates. No one went to jail and no one lost their job.
- We have medical societies, medical licensing boards, and hospitals intimidating doctors and nurses to remain silent about the massive destruction of lives by this whole pandemic episode and especially the injections. Both doctors and nurses have lost their right to practice for refusing to remain silent concerning this unending life destroying episode.
- The so-called “vaccine” has been shown to have no effect on covid-19 transmission and little ability to prevent infection. It is now evident that the vaccinated are the superspreaders of these viral variants. Why are we being told that the vaccinated have a milder infection, when the ICUs and hospitals are occupied by serious cases of infection among the “vaccinated”. Almost all patients admitted to hospitals have been injected with one of these deadly injections.
- Why are individuals being told that they must agree to be injected with these deadly injections or lose their jobs? Further, when individuals are forced to take these deadly injections and they become incapacitated, where are the company heads who forced them to take the injections. These unfortunate people, not only can no longer work at their previous job, they cannot work at virtually any job. Are they compensated by the employer who forced them to get injected? No! They are left on their own. Should they die, will the monsters who forced them to take the injection pay for all the funeral expenses? Don't hold your breath.
- Why are we continuing to force people to accept these injections, including all boosters, people holding essential jobs—doctors, nurses, medical technicians,

radiology technicians and even secretaries in hospitals, members of the armed forces, firemen, EMS personnel and other such critical workers? They are being mandated to take these injections when it is accepted that these injections do not stop the spread or prevent the infection—the only two reasons, even in the furthest of imaginations, as why one would even consider mandating such injections.

- It is not the unvaccinated that were spreading these viruses and variants—it is the vaccinated. Because a significant percentage show few signs of infection they continued to go to work, attend parties, go to church services, and other gatherings—spreading high levels of the virus, especially the variants among everyone they come into contact with. It has been estimated that the vaccinated have 250 times higher concentrations of the virus in their noses than do the unvaccinated when sick.
- No one seems to want to answer the question—Why are these companies, hospitals, the military, etc. mandating a “so-called vaccine” for a virus that NO LONGER EXIST? The vaccine being mandated is for the SARS-CoV-2 virus, which has all but disappeared from the scene. Even the boosters are designed to a virus that does not exist, even though an attempt is being made to address this obvious oversight.
- Why, despite highly convincing evidence, that these injections progressive erode innate immunity, the most important arm of the immune system, are we being forced and cajoled into taking these injections? Are these controllers trying to destroy the immune system of hundreds of millions of people?
- Why did Fauci, the CDC and FDA all insist that children, down to small babies, be injected with a vaccine that has had millions of admitted complications and resulted in the deaths of no less than 40,000 adults. The true number of deaths is in the hundreds of thousands, just in the United States.
- Why did the CDC, NIH and other organs of authority encourage pregnant women to receive these genetic injections, when they knew that no studies had been done on the effects on the mother or the child, either short or long term? The only study done after thousands of pregnant women were injected, was found to state fraudulently that the injection was safe, when it was disclosed after reexamination that in truth the study found an 83% higher miscarriage rate among pregnant women injected during the first trimester. Why did they not tell these women- NO LONG TERM STUDIES HAVE EVER BEEN DONE TO SEE WHAT PROBLEMS COULD ARISE?
- Why was the biodistribution study kept from the public?
- Why did Pfizer seek a court order sealing the data from their so-called “safety and efficacy study” for the first 55 years and the 75 years? Why would you do that unless you were trying to hide the shoddy way the study was done and obvious coverups of complications occurring during the study—many resulting in permanent injuries of a very serious nature?
- With the compelling data showing these injections result in fatal and crippling blood clots and much more common microthrombosis, why is there no program to test every injected person with the D-dimer test to look for early signs of such a disaster occurring? How many strokes, heart attacks, lost limbs and damaged organs have to

occur before these controllers take proper action? I think I know why, based on studies by at least two cardiologists who did the test on all their injected patients—both found high levels of D-dimer in over 80% of their patients.

- How many young people, especially males, have to suffer permanent heart damage in the form of myocarditis, before we end this madness?
- Why in the name of all common sense would airlines insist all pilots be injected with this devastating injection when the risk of the pilot dying while in flight, especially when taking off or landing, is significantly high. Not only is the pilot's life at risk but all of the passengers on the airline—should hundreds of people die because the CEOs of the airlines yielded to pressure to force the injections on all their pilots. Over 1500 flights have recently been canceled—mostly because of a shortage of pilots, many of which are so sick they cannot pass their flight tests.
- Now that we have evidence of the following, there is no sense in mandating or even encouraging these injections:
 - The injections are for a virus that no longer exists and has no effectiveness on the variants.
 - The injected are the number one superspreaders of the virus—not the unvaccinated
 - The injections and the booster progressive erode the most critical arm of the immune system –dramatically raising the risk of:
 - Cancer
 - Autoimmune disorders
 - Heart attacks and strokes
 - Activation of latent viruses
 - Susceptibility to numerous infections, viral, bacterial and fungal
 - Why is there no discussion of the millions of lives that have been ruined by the draconian measures implemented by the authorities, which have been proven, and now admitted, to have been of no benefit? Will Fauci and company restore all the thousands of businesses that were permanently destroyed by these ineffective measures? Will they answer for the neurodevelopmental damage caused by the schools mandating mask wearing by the students—especially the very young students?

The answer to all these questions is that they will do absolutely nothing to answer for the massive devastation they have triggered, and continue to cause, within our society—nothing! The vaccinated people will continue to die in great numbers and many more will be crippled for life. This has all been and continues to be a grand lie told on a monumental scale—it is fraud that surpasses all such cases in history combined.
